

# MONDAY

- What is the time?
- How many days are in July?

- Is this line horizontal or vertical?

4. X ————— Y

How long is line XY?      cm

- mm = 1 cm
- hours = 1 day
- Which direction is this?  
☐ clockwise    ☐ anticlockwise
- Round 46 to the nearest ten.

- X (Roman numeral) =
- In 478, what is the place value of the 7?  
☐ 100s    ☐ 10s    ☐ 1s
- $80 + 50 =$
- $12 + 6 =$
- What 2-D polygon has 6 sides?

- $9 - 2 =$
- $2^2 = 2 \times 2 =$
- $33 \div 3 =$  So  $3 \times$       = 33
- $32 + 10 =$
- An electric kettle takes 3 minutes to boil a litre of water. How long should it take to boil  $1\frac{1}{2}$  litres?  
minutes
- What is the number before 200?
- 11, 15, 19, 23,

# TUESDAY

- What is the time?
- Round 112 to the nearest 100.

- Which direction is this?  
☐ clockwise    ☐ anticlockwise
- Congruent means the same shape and the same

- $4 + 7 =$
- $11 + 10 =$
- Natasha's mobile phone costs her 45c for every 30 seconds. If she spoke for a minute what would be her cost?

- 1 m =      cm
- $4 \div 1 =$  so  $1 \times$       = 4
- Is this line horizontal or vertical?

- Name this 3-D shape.

- XI (Roman numeral) =
- Share \$40.00 among 4 students =  
\$      each
- $700 + 200 =$
- 12, 17, 22, 27,      Rule: Add
- $\$4.00 + \$6.20 =$
- $3 + 3 + 3 + 3 + 3 + 3 =$
- $900 - 600 =$
- $2 \times 9 =$  +      =
- If you buy 8 pens for \$2.00 each the total cost is \$

# WEDNESDAY

- What is the time?
- In a 50-m pool you swam 100 m. How many laps?

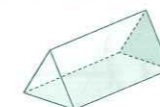

- $8 + 7 =$
- $19 - 10 =$
- $21 + 10 =$
- Which months are in spring?  
☐ September, October, November  
☐ October, November, December

- $10 + 10 =$
- XII (Roman numeral) =
- Write one hundred and seventy as a numeral.

- Round 195 to the nearest 100.
- Alex and Kieren bought 16 ice-creams, altogether, both bought the same number. How many ice-creams did Alex have?

- $10 \div 2 =$
- Name this 3-D shape.

- Which direction is this?  
☐ clockwise    ☐ anticlockwise

- $7 \times 3 =$
- $6 \times 0 =$
- $\$3.00 - \$1.50 =$
- Name this 2-D shape.

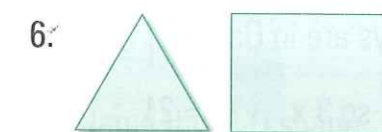

- How many days are in June?
- Is sunrise am or pm?

# THURSDAY

- What is the time?
- $100 \div 10 =$
- In a 50-m pool you swam 250 m. How many laps did you swim?
- $5^2 = 5 \times 5 =$
- What 2-D shape has eight sides?

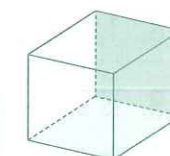

Are these 2-D shapes congruent?

- Sam baked 6 pies for her 2 friends. How many pies do they each get?
- Write the number sentence for Question 7.

$\div$       =

- Name this 3-D shape.

- Which direction is this?  
☐ clockwise    ☐ anticlockwise

- $100 + 70 + 3 =$
- $20 + 30 =$
- $24 - 10 =$
- $15 - 6 =$
- $\$10.00 - \$3.50 =$

- IV (Roman numeral) =
- How many days are in a leap year?

- Round 193 to the nearest 100.
- $3 \times 8 =$  +      +      =
- $5 \times 7 =$
